50X1-HUM

5 November

Report: Mostly cloudy with rain. Clearing in the morning in northern Serbia, the Vojvodina, and Slovenia. Moderate southerly winds; northerly winds in northwestern sections. Temperatures at 1300 hours, about 8 degrees; in Serbia, the Primorje, and Macedonia, about 15 degrees.

6 November

Report: Cloudy with rain and snow in Serbia and Bosnia; rain in the Vojvodina and Macedonia. Clearing in Slovenia, Croatia, and the Primorje. Light winds. Temperatures at 1300 hours, 3-7 degrees in Slovenia and Croatia.

7 November

Forecast: Slightly to moderately cloudy; considerably cloudy with possible precipitation in the extreme south. Light winds. No change in temperature.

8 November

Forecast: Mostly cloudy with light local showers in Slovenia, Croatia, and in the northern Primorje; moderately cloudy in other sections. Moderate south winds in the Primorje; light to moderate variable winds in the interior. No change in temperature.

#### HEAVY RAINS THROUGHOUT YUGOSLAVIA -- Belgrade, Borba, 28 Oct 50

Heavy rainfalls are now occurring in the northern Adriatic area, Lika, and western Bosnia. Between 24 and 26 October, the average rainfall in Yugoslavia was 20-40 millimeters. Slavonia and Serbia had slightly less rain during that period and the Vojvodina had an average of 20-30 millimeters. The Kvarner and Boka Kotorska area had over 100 millimeters of rain between 24 and 26 October. These rains caused a slight delay in planting and especially in plowing in flooded areas. Clear and windless days are forecast for fall. No great drop in temperature is expected in November.

The rains facilitated deep plowing. However, between 20 and 25 October not even 4,000 hectares of land were plowed in this manner, while a total of 275,000 hectares of land were plowed in the ordinary way as of 20 October throughout Yugoslavia. In the Timok, Kragujevac, and Titovo Uzice areas, only 672 hectares of land were plowed deeply before the rains came. During the last few days, 661 additional hectares of land were plowed in this manner in the above areas.

#### WEATHER IN SLOVENIA -- Ljubljana, Slovenski Porocevalec, 30 Oct - 6 Nov 1950

30 October

Report: Cloudy, snow, and rain. Lowest temperature, -3 degrees (centigrade) in Planica. The barometric pressure was 732.8 millimeters at 0700 hours in Ljubljana; temperature, 8 degrees; humidity, 96 percent.
